CHARACTERISTICS

PURE TONIC is an exceptional add-in product for turfgrass systems that is absorbed directly through turfgrass leaves in true foliar applications or within the entire adventitious root system from rootzone applications. Through a proprietary blend of key amino acids and nutrients, organic substances, **PURE TONIC** breathes life into turf even under abiotic or biotic stressors.

With direct influence on microbiology surrounding the turfgrass plant, it utilizes the power of a multitude of organic processes, all stimulating positive turfgrass performance. This product is a wonderful complement to any nutritional program and works best when mixed with other **PURE Insight** products as a **full PURE** nutritional program in any turfgrass system.

MODE OF USE

PURE TONIC with its proprietary blend of key organic compounds, stimulates turf vigor, health and performance at any time. This unique combination of ingredients works in harmony with turfgrass to excel at positive growth and performance even under the greatest of biotic and abiotic stressors.

Turfgrass Application:

Foliar:
Apply as a foliar application at a rate of 5–20 L/Ha (1.57–6.28 oz/M) and allow to dry on the leaves before irrigation or other subsequent applications. Carrier rate: 200–400 L/Ha (21–43 gal/A) with well dispersed droplets for full foliar coverage.

Rootzone Application:
Apply at 5–20 L/Ha (1.57 – 6.28 oz/M) and follow immediately with enough irrigation to penetrate evenly to 6 cm (2.36") depth. Be careful not to overwater.

Interval:
Apply every 10 – 14 days for best results, or anytime you wish to complement other compatible products or enhance overall turfgrass performance. If adjusting to tighter intervals, reduce application rate accordingly. Longer intervals can diminish the full effect of foliar activity on new young leaves that are constantly being regenerated otherwise.

PRECAUTIONS

The user assumes all risks associated with handling and application. Store in original packaging in cool, dry conditions out of direct sunlight. Best stored between 4.5°C –45°C. For best results, consult with a **PURE INSIGHT** representative.

This product is compatible with most foliar nutrition or plant protectant products and best mixed with other **PURE INSIGHT** products. However, conduct a jar test or turf test to determine complete compatibility when mixed with other products.
